TECHNICAL SKILLS

LANGUAGES

Python, Java, JavaScript (ES6+), SQL, HTML5, CSS3

FRAMEWORKS

Next.js (App Router), React.js, Django, Django REST Framework

DATABASES

PostgreSQL, MySQL, SQLite, MongoDB

TOOLS & METHODS

Git, JWT Auth, Service Workers, Web Push, Tabulator, Chart.js, Unicorn

EDUCATION

M.Sc. in Computer Science

P.V.G's College, Pune
2021 – 2024 | Grade: A+ (CGPA: 8.35)

B.Sc. in Computer Science

P.V.G's College, Pune
2018 – 2021 | Grade: A+ (CGPA: 8.14)

PROFESSIONAL SUMMARY

Passionate and results-driven Software Developer & Technical Leader with a Master's in Computer Science and hands-on experience designing and building secure, scalable multi-tenant SaaS products and full-stack web applications. Expert in Django backend API design, database modeling, high-concurrency database row-locking (select_for_update), and responsive Next.js frontend interfaces. Eager to contribute to dynamic engineering teams and build high-quality web applications.

PROFESSIONAL EXPERIENCE

iSyra — Team Lead

Jul 2025 – Present | Pune, India (Remote)

- Lead end-to-end product delivery of secure multi-tenant SaaS platforms, translating business requirements into scalable DRF/Next.js architectures.
- Oversee application security compliance and secure development practices, ensuring data safety and privacy across the full codebase.
- Architected and deployed a SaaS Skill Tracking platform, directing core technical layouts and managing repository pipelines.

iSyra — Fullstack JavaScript Developer

May 2024 – Jul 2025 | Pune, India (Remote)

- Contributed to the full application lifecycle of an enterprise Calibration Management System, designing SQL schemas and REST APIs.
- Built interactive, high-performance dashboards and data analytics widgets using React, Tailwind CSS, and Tabulator.
- Implemented stateless SimpleJWT authentication on the backend with custom client-side axios interceptors for token refresh flows.

PERSONAL PROJECTS

MOM (Minutes of Meeting) Platform | Next.js, Django, DRF, PostgreSQL, Service Workers

Live Link: mom-frontend-nine.vercel.app/login

- Developed a minutes tracking portal featuring real-time meeting analytics, email dispatch scheduler, and Web Push notifications.
- Integrated PostgreSQL database transaction locking using select_for_update to prevent duplicate updates during concurrent edits.

Door-Step Technical Services | Java (JDBC), MySQL, JSP, Servlets, HTML/CSS

Academic & Freelance Project

- Built doorstep repair scheduling system for NS Computer Hub featuring operator queue assignments, order tracking pipelines, and MySQL database connectivity.
